M.O.A.V.

What's the M.O.A.V.?

Mother Of All Vacuums

- 5x the performance of our 23hp Impeller Vacuum!
- Capable of no operating downtime* when changing bags!
- Trailer mounting to cut down on job-site setup!

The M.O.A.V.'s power is absolutely insane!

Our new M.O.A.V. is a rugged, powerful vacuum that can turn those day-jobs into hour-jobs.

Did we mention it is the equivalent of 5 of our 23 h.p. Impeller vacuums?

This unit is no slouch!

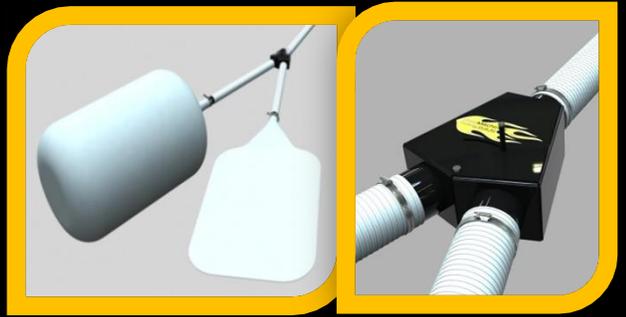

The Next Generation of Gas Vacuum

- Large, **37 h.p. Briggs and Stratton (Vanguard) engine** for solid power. Largest vacuum engine in our lineup!
- Large P.D. (Positive Displacement) vacuum provides **massive performance gains** over an impeller unit. (5x's more suction-static pressure)
- No High Speed Impeller; means much **less maintenance** due to worn/damaged impellers and chambers.
- **No overheating concerns** with the engine cooling air and muffler exhaust plumbed outside of trailer.
- **As quiet as our impeller vacuums**; Considerably quieter than high speed air-raid siren noise of belt drive vacuums!
- Trailer/skid mounted system **reduces set-up time** and **lowers risk of transport abuse** and damage like that of smaller units. Pull hoses, connect, and fire up the engine!

We have the industry's highest rated, heavy duty, wet/dry gas vacuums with cutting edge design features.

*Optional **Cool Diverter Valve** for **non-stop vacuuming!**

Divert fiber stream to an empty bag while the operator changes the full bag.

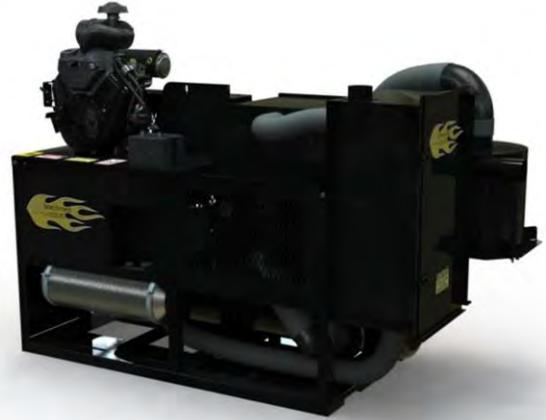

Cutting Edge Cool!

[Images and Text Subject to Change...so we can make things Cooler!]

37 h.p. 'M.O.A.V.'

Specifications:

- **Weight:** 1500 lbs.
- **Dimensions:** 95" long x 50" wide x 70" high
- 6" dia. intake/output
- **Engine:** Briggs "Vanguard" V-twin OHV, 10 gallon tank, positive pressure lubrication, low level oil shutdown, oil pressure shutdown switch, r.p.m./hourmeter, Electronic Fuel Injection (EFI).
- **Electric Start:** with included 12 volt battery. Integrated engine block cooling air filter.
- **Engine Warranty:** 2 year consumer/1 year commercial
- **Vacuum Size:** Massive 800 c.f.m. 12" Hg or 123" water column. (5x's more than impeller vacuums)
- **Vacuum Speed:**
Fills standard 75 ft³ collect bag in minutes.

Options:

- **Diverter Valve** for non-stop continuous vacuuming
- **Wireless Remote** control (on/off from attic)

Trailer/Pickup Mounting Options

Option #1

Trailer Lengthwise Mount

Option #2

Trailer Sideways Mount

Option #3

Pickup Truck Mount
